Temporary override "Hold Until"2. Permanent override "Permanent Hold" Hold Until The schedule will resume when the Hold Until time expires. To cancel • Touch the Hold Until and resume the regular schedule.9309302101. Touch to adjust temperature.1050195TO 10302. During temperature adjustment, the Until time appears.93010041050195TO 10301050 TO 11003. Touch the time to change it and use to adjust.14. indicates Hold Until is active.Page 12Overriding a program schedule (continued)Permanent Hold10042101. Touch to deactivate the schedule and activate permanent hold.2. Touch to adjust temperature. To cancel the Permanent Hold and3. Touch to resume the regular schedule.GeofencingYour new Lyric Smart Thermostat supports location-based scheduling which can intelligently override the time-based schedule. If your schedule varies or you regularly depart and return at different times, the Lyric Thermostat can automatically adjust to your life. No rigid scheduling. No learning period. Just comfort when you're home and savings when you're away. When you enable the Lyric geofence schedule, it intelligently controls your heating based on whether you are home or away. • Active geofence schedule is indicated by the top left corner of the screen. Home/Away/Sleep status is indicated by • To learn more about configuring the geofence schedule, see 'Create New Schedule' menu in your Lyric App. • To learn more about how smart geofencing can work for you and how it fits to your busy lifestyle, go to getconnected.honeywell.com12Page 13Optimisation functionsYour Thermostat has several optimisation functions. These functions aim to save energy while making you as comfortable as possible. Configure these options via the OPTIMISE menu on your Thermostat. • Optimum Start Over time, the Thermostat learns how long it takes your system to reach the temperature you want. It turns on the heating or cooling system earlier to make sure you're comfortable at the time you expect. The Thermostat displays when it turns the system on early. • Optimum Stop Saves energy and money by switching off a little bit earlier than the normal programmed time. If your home is up to temperature, you will not notice the effect on the temperature, but you will see a difference in your fuel bill. • Delayed Start Saves energy by slightly delaying the start of heating depending on the difference between the programmed temperature and the actual room temperature. Locking the interface Your Lyric Thermostat has a lock function, which can restrict access to the Thermostat interface in two levels: • PARTIAL: Allows changing the setpoint temperature only • FULL: Restricts all access to the Thermostat interface When the function is activated a PIN is given to unlock the thermostat - take note of the PIN.13Page 14TroubleshootingIf you have difficulty with your Thermostat, try these suggestions. Most problems can be corrected quickly and easily. Screen is blank • Make sure power is switched on. • Check circuit breaker and reset if necessary. Heating system does not respond List of alerts: Touch to dismiss the alert. • Touch to set system to Heat. Make sure the set temperature is higher than the actual temperature. • Check the circuit breaker and reset if necessary. • Check the heating system is powered on. • Check the Receiver Box is working. To snooze the alert for 7 days WIFI RADIO ERROR The Wi-Fi radio of your Thermostat is faulty. contact your installer.
