Air pollution essay in kannada pdf

Essay on Environment

Environment Essay 1 (100 words)

An environment is the natural surroundings which help life to grow, nourish and destroy on this planet called earth. Natural environment plays a great role in the existence of life on earth and it helps human beings, animals and other living things to grow and develop naturally. But due to some bad and selfish activities of the human beings, our environment is getting affected. It is the most important topic that everyone must know how to protect our environment to keep it safe forever as well as ensure the nature's balance on this planet to continue the existence of life.

Environment Essay 2 (150 words)

As we all are well familiar with the environment, it is everything which surrounds us naturally and affects our daily lives on the earth. Everything comes under an environment, the air which we breathe every moment, the water which we use for our daily routine, plants, animals and other living things, etc around us. An environment is called healthy environment when natural cycle goes side by side without any disturbance. Any type of disturbance in the nature's balance affects the environment totally which ruins the human lives. Now, in the era of advance living standard of the human being, our environment is getting affected to a great extent by the means of air pollution, noise pollution, deforestation, water pollution, soil pollution, acid rain and other dangerous disasters created by the human beings through technological advancement. We all must take an oath together to protect our natural environment to keep it safe as usual forever.

Environment Essay 3 (200 words)

Environment means all the natural surroundings such as land, air, water, plants, animals, solid material, wastes, sunlight, forests and other

things. Healthy environment maintains the nature's balance as well as helps in growing, nourishing and developing all the living things on the earth. However, now a day, some manmade technological advancement spoiling the environment in many ways which ultimately disturbs the balance or equilibrium of nature. We are keeping our lives in danger as well as existence of life in future on this planet.

If we do anything in wrong way out of the discipline of nature, it disturbs the whole environment means atmosphere, hydrosphere and lithosphere. Besides natural environment, a man made environment is also exists which deals with the technology, work environment, aesthetics, transportation, housing, utilities, urbanization, etc. Man made environment affects the natural environment to a great extent which we all must be together to save it.

The components of the natural environment are used as a resource however it is also exploited by the human being in order to fulfil some basic physical needs and purpose of life. We should not challenge our natural resources and stop putting so much pollution or waste to the environment. We should value our natural resources and use them by staying under the natural discipline.

Environment Essay 4 (250 words)

An environment includes all the natural resources which surround us to help in number of ways. It provides us better medium to grow and develop. It gives us all things which we need to live our life on this planet. However, our environment also need some help from all of us to get maintained as usual, to nourish our lives forever and to never ruin our lives. The elements of our environment are declining day by day because of the manmade technological disaster.

We need to maintain the originality of our environment to continue the life on the earth, the only place where life is possible till now in the whole universe. **World Environment Day** is a campaign being celebrated for years every year on 5th of June

AIR POLLUTION ESSAY 2 (150 WORDS)

Air pollution is one of the main environmental issues nowadays. There are many reasons behind the air pollution. Some are natural and some are caused by the human activities. Transport means, industrialisation, growing cities, etc. The sources of air pollution are mainly categorized into two types: natural sources and man-made sources. Green layer is also getting effected too due to the air pollution which causes many health problems. The air pollution is increasing day by day. The proportion of man-made pollution is very high. Every human being releases carbon dioxide when he breathes. Making greenhouse gases than ever before is forcing the climate change.

Chemicals released from the vehicles, factories, power plants and factories contain lead, nitrogen releases carbon monoxide, transport means releases CO2 and other toxic substances. The burning of fossil fuels like coal, oil, gas, wood, etc. is also causing air pollution. Burning of coal and oil releases smoke and dust. In order to reduce the level of air pollution we should bring some huge changes to our habits on daily basis. We

The essay: a sample for an argumentative (persuasion) essay

This essay tries to persuade citizens of Posey County to oppose the building of a coke-processing plant. The essay is reduced in size; an actual essay would have more material and longer paragraphs. The content does not acknowledge arguments from the opposition, but is a rebuttal to the process that has allowed the plant to gain preliminary approval. The essay, like many papers, has three parts. The introduction starts with startling facts about the increased chances of residents getting lung cancer. The thesis statement, beginning with "Citizens concerned about their health..." is a call to action. The body of the essay offers detailed facts about dangerous particulates, damaging effects from pollution, and economic side effects of the plant. The conclusion is a brief summary and a forceful final sentence that suggests using politics to stop the plant. Note the topic sentences that begin each body paragraph and the facts that support the topic sentences. (The following sample of an essay has been adapted for instructional purposes by Dennis Buskirk from Webster's New World Student Writing Handbook, Fourth Edition, by Sharon Sorenson, IDG Books Worldwide, Inc., 1997, pp. 154-156.)

The New Coke Processing Plant: Your Health is in Danger

If you plan on working in the new coke processing plant being built at the edge of town, you might want to check your health insurance policy. The reason, your chance of getting lung cancer could be up to ten times that of the average worker elsewhere. And what if you don't work there, but just live nearby? You still won't escape because you will have a higher chance of getting lung cancer than if you lived in another area. Fir River Resources, Inc. already has preliminary approval to build a coke processing plant just 3 1/2 miles southwest of our town. Before you allow this to happen, there may be something you should consider. If the proposed plant is built, Posey County, as well as all neighboring counties, will likely see an increased rate of death by lung cancer caused by the plant's pollutants. Citizens concerned about their health and the health of their families will want to learn more about these pollutants and oppose the construction of this plant.

Scientists have studied the chemicals used in coke-processing plants and have found them to be dangerous to human beings. They believe that two chemical compounds, called initiators and promoters, work together to cause cancer. The coking plant being built will emit benz(a)pyrene, an initiator. The phenol plant, located near the coke-processing plant emits phenolics, which are promoters. The combination may lead to significant increases in cancer among local residents. In two independent studies in the U.S., coke oven workers exhibited a lung cancer rate 2 1/2 to 10 times greater than that in other workers. In another study in southern Ohio, several counties near these plants showed high death rates from cancer of the large intestines, liver and bladder. Finally, particulate emissions from coke plants have been found to be 500 times more cancer causing than the particulates in cigarette smoke.

If the coke processing plant is built, we can also expect other types of effects. For instance, we can expect to see a rise in mutations of babies. Some could die of serious malformations; others will live, perhaps a worse fate. Emissions from coking plants interfere with the development of DNA, the biological compound that makes us all different, and that interference causes mutations. In addition, we might expect to see significant crop damage. Although Fir River says the plant will cause no damage to crops, the plant's nine smokestacks will emit 30,000 pounds of sulfur dioxide per day, which is 5,700 tons per year. Another damaging effect will be water pollution: coal-pile run-off produces pollutants that will flow into the Ohio River. Finally, the plant will ship in 750,000 tons of coal annually, but ships out only 540,000 tons of coke. This leaves over 1 million pounds of waste per day in Posey County.

Finally, the pollutants could cause Posey County to become economically stagnant. Although the plant will provide 70 more jobs, it will consume 87 percent of the county's pollution increment for sulfur dioxide. Because it may lead to a violation of the National Ambient Air Standard for Particulates, this could severely hamper further industrial expansion. Mead Johnson, which recently announced plans for a major new warehouse in anticipation of a major manufacturing expansion, could be prevented from moving into the area. SIGECO, responsible for providing the tri-state area with power, may be unable to pursue plans to expand. In the future, as our county's population increases, one of two things will happen: either unemployment will increase, or residents will be forced to leave the county to seek work elsewhere.

Whether your concern is for your personal health, your children's future, the economic future of the community, or the future of the world's environment, you cannot afford to ignore this proposed coke-processing plant. Becoming involved now could make the difference in the quality of life for residents for many years to come. Your influence will help. Contact your local county supervisors and express your concern. We must fight politics in the political way—with the force of the multitudes.
